Abstract:
The mission of the United Board is to promote Christian presence through Whole Person Education in Asian higher education. One way to do this is through Service-Learning, a teaching-learning methodology that combines "learning to serve and serving to learn". Hence, it touches the whole person - not only the mind, but also the heart. Service-learners get to learn not only from books but also from real-life issues; they get to test academic theories in real-life situations; they get their training not only in the classroom but also with the communities. This is Whole Person Education.
